

Eligible Professional Attestation Worksheet for Modified Stage 2 of the Medicare Electronic Health Record (EHR) Incentive Program in 2015

The Eligible Professional (EP) Attestation Worksheet is for EPs in the EHR Incentive Program in 2015, and allows them to log their meaningful use measures on this page to use as a reference when attesting for the Medicare EHR Incentive Program in the CMS system.

For each objective with a percentage-based measure, certified EHR technology must include the capability to electronically record the numerator and denominator and generate a report including the numerator, denominator, and resulting percentage for these measures. However, eligible professionals may use additional data to calculate numerators and denominators and to generate reports on all measures for the objectives.

Note: There are several alternate exclusions and specifications for certain measures in 2015, which some Stage 1 providers may not otherwise be able to meet because they require the implementation of certified EHR technology beyond the functions required for Stage 1. In order to provide complete and accurate information for certain measures, eligible professionals may also have to include information from paper-based patient records or from records maintained in uncertified EHR technology.

Eligible professionals can enter their meaningful use criteria in the blue boxes. Each measure's objective is included to help eligible professionals enter the correct criteria. Certain measures do not require a numerator and denominator, but rather a yes/no answer, and are marked as such. Measures with exclusions have the exclusion description listed in the measure information section.

Eligible professionals must report on the following:

1. **10 objectives**, which includes one consolidated public health reporting objective with measure options requiring EPs scheduled to be in Stage 1 to meet at least one public health measure, and EPs scheduled to be in Stage 2 to meet two public health measures.
2. **9 out of 64 of the clinical quality measures (CQMs)** covering at least 3 National Quality Strategy domains

EHR Reporting Period: For 2015, the EHR Reporting period is any continuous 90-day period within the calendar year.

Meaningful Use Objectives and Measures

Must fill out for each of the 10 objectives including 1 public health measure for EPs previously scheduled to be in Stage 1 in 2015 and 2 public health measures for EPs previously scheduled to be in Stage 2 in 2015.
