

# Medicaid EHR Incentive Program PY2021 Virtual MU Info Session

June 9, 2021

Today's presenters:  
Thomas Bennett  
Margaret Lellman

# Disclaimer

---

*This presentation was current at the time it was presented, published or uploaded onto the web. This presentation was prepared as a service to the public and is not intended to grant rights or impose obligations. This presentation may contain references or links to statutes, regulations, or other policy materials. The information provided is only intended to be a general summary. It is not intended to take the place of either the written law or regulations. We encourage attendees to review the specific statutes, regulations, and other interpretive materials for a full and accurate statement of their contents.*

# Agenda

---

- Attestation Timeline and Program Sunset
- PY2021 MU Requirements
  - Objective 1 Protected Health Information (SRA)
  - Objective 3 Clinical Decision Support (CDS)
  - Objective 5 Patient Electronic Access and API
  - Objective 7 Health Information Exchange (HIE)
- Documentation and Post-Audits
- MU Resources and Technical Assistance

# Attestation Timelines and Program Sunset

The Program Year 2021 attestation period is scheduled for  
June 1, 2021 – August 3, 2021

The deadline to submit PY2021 applications is  
**August 3, 2021**

To allow time to process applications and ensure that all incentives are **paid** by **December 31, 2021**, the PY2021 deadline needs to be well before the end of 2021

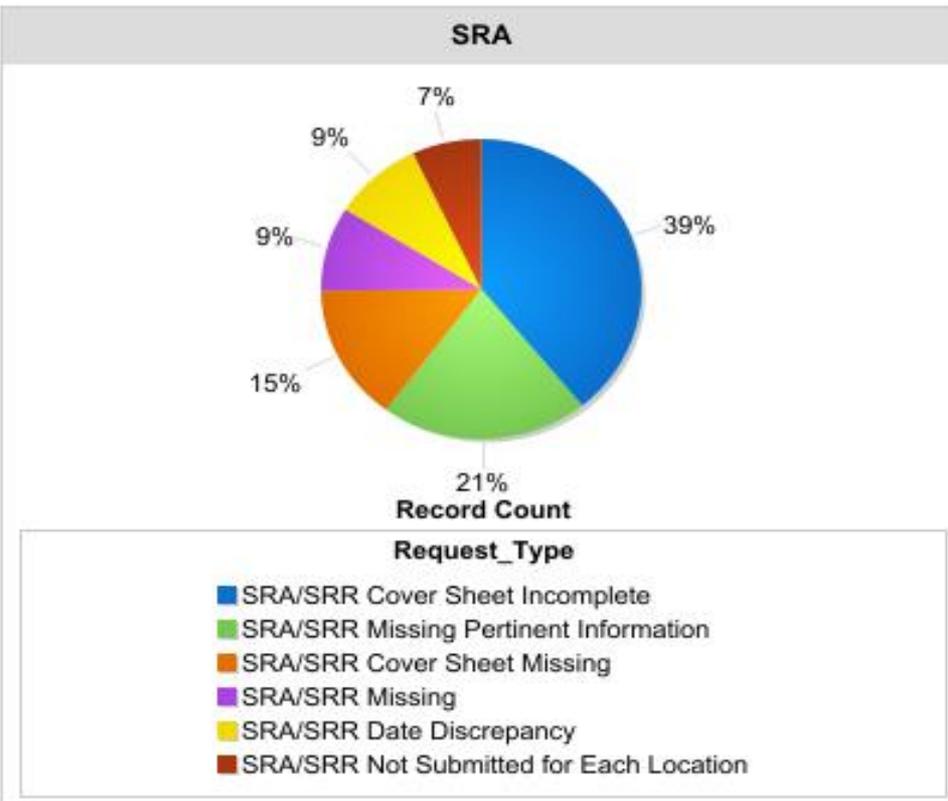

To prepare for Program Sunset at the end of 2021:

- adjustments were made to the deadlines for both PY2020 and PY2021
- MAPIR was updated to allow more than one active application to be open simultaneously (only applies to PY2020 and PY2021 apps)
  - In order to have two applications open simultaneously, an EP must have at least **two payment years** left

## Protected Health Information Security Risk Analysis (SRA)

# Common Issues – Security Risk Analysis (SRA)

Common reasons for apps cycling  
(PY2020 MU applications)

- SRA/SRR Cover Sheet missing/incomplete
- SRA/SRR missing required information
- SRA not provided for all locations
- Completing SRA after August 3<sup>rd</sup> deadline

# PY2021 MU Requirements – Security Risk Analysis (SRA)

## Security Risk Analysis (SRA)

### Measure

Conduct or review security risk analysis (SRA/SRR), including:

- Address encryption and other technical, administrative, and physical safeguards
  - Identify potential risks and vulnerabilities, and include in risk management process
  - Correct identified security deficiencies and implement updates as necessary
- Conduct SRA within the calendar year of the EHR reporting period (Jan 1, 2021 – Dec 31, 2021)
  - EPs can complete an SRA/SRR after the deadline or date of attestation, but must pledge to upload a completed SRA/SRR by December 31, 2021. Designees will be required to attest as such in MAPIR (see next slide).

# PY2021 MU Requirements – Security Risk Analysis (SRA)

## Security Risk Analysis (SRA)

- EPs will be able to complete an SRA/SRR after the date of attestation but must pledge in MAPIR to complete it by the end of calendar year 2021. EPS are strongly encouraged to conduct the analysis or review by the time of attestation or by August 3.

**Objective 1 - Protect Patient Health Information**

Click [HERE](#) to review CMS Guidelines for this measure.

Click the **Save & Continue** to proceed. Click **Return to Main** to access the main attestation topic list. Click **Clear All Entries** to remove entered data.

**(\*) Red asterisk indicates a required field.**

**Objective:** Protect electronic protected health information (ePHE) created or maintained by the Certified EHR Technology (CEHRT) through the implementation of appropriate technical, administrative, and physical safeguards.

**Measure:** Conduct or review a security risk analysis in accordance with the requirements under 45 CFR 164.308(a)(1), including addressing the security (including encryption) of data created or maintained by Certified EHR Technology in accordance with requirements under 45 CFR 164.312(a)(2)(iv) and 45 CFR 164.306(d)(3), implement security updates as necessary, and correct identified security deficiencies as part of the provider's risk management process.

\*Did you meet this measure prior to the date of attestation?  
 Yes  No

If 'Yes', please enter the following information:

Date (MM/DD/YYYY):

Name and Title (Person who conducted or reviewed the security risk analysis):

If 'No' is answered above: Do you attest you will complete your Security Risk Analysis (SRA) no later than the end of day, December 31, 2021 and understand your incentive payment will be subject to recoupment for failure to do so?  
 Yes  No

Pledge to complete an SRA/SRR by December 31, 2021.

# PY2021 MU Requirements – Security Risk Analysis (SRA)

## Security Risk Analysis Supporting Documentation

- Security Risk Analysis/Review Cover Sheet
  - Initialed next to all the applicable responses
  - Signed by the authorized official
  
- Security Risk Analysis (SRA)
  - Date analysis/review was conducted
  - All locations/practices EP worked during the selected EHR reporting period
  - Name and Title of the person who performed the analysis /review
  - Signature of the authorized person
  - Required safeguards and mitigation plan

Protect electronic protected health information (ePHI) created or maintained by the Certified EHR Technology through the implementation of appropriate technical capabilities.

Measure = **Yes**  
Date = **02/13/2019**  
Name and Title = **Bhawna Sehgal,  
PEVA**

1) To meet my Meaningful Use objectives, I am:

Submitting an SRA for the first time

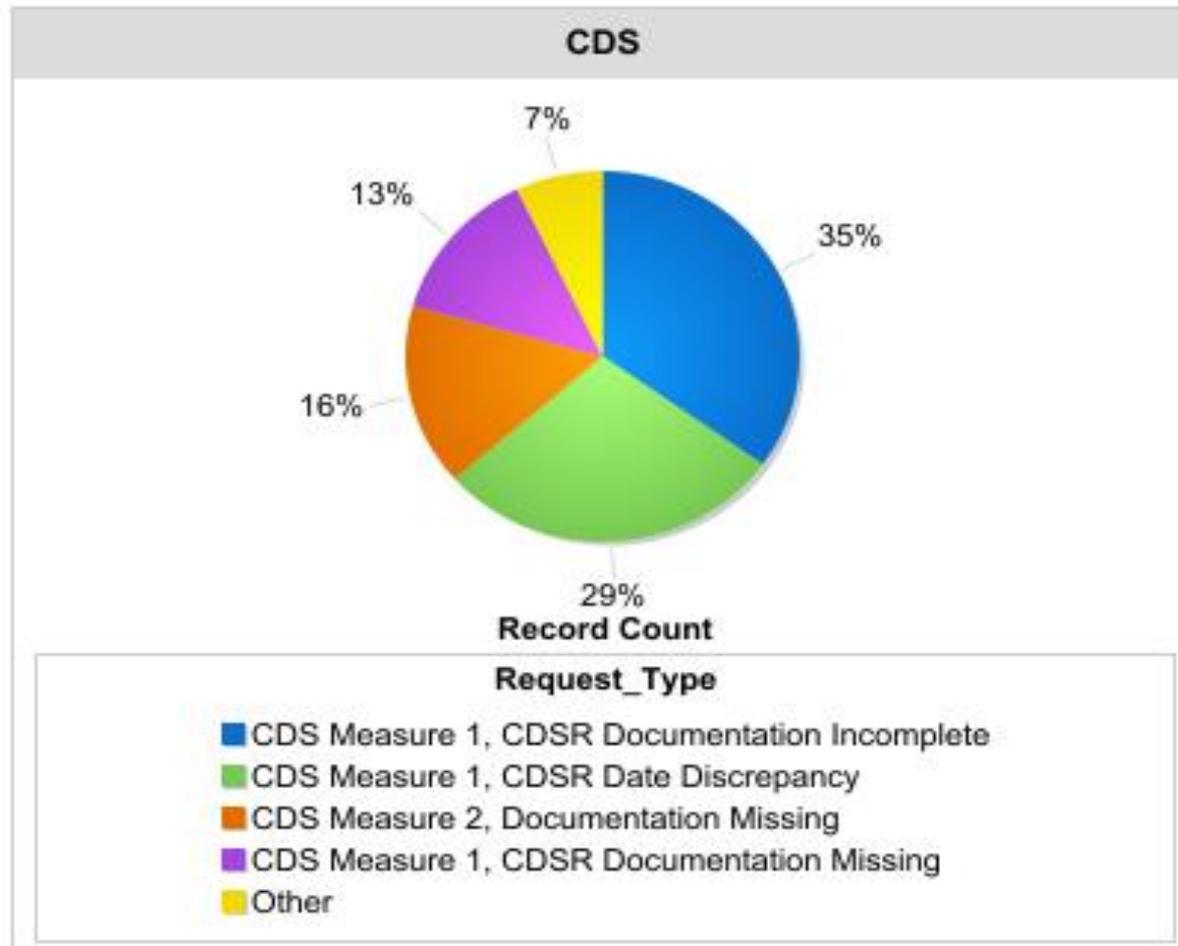

-or-

Submitting an SRR or update to a previously submitted SRA

## Clinical Decision Support (CDS)

# Common Issues – Clinical Decision Support (CDS)

Common reasons for apps cycling  
(PY2020 MU applications)

# PY2021 MU Requirements – Clinical Decision Support (CDS)

- CDS defined too narrowly
  - Not just alerts
  - Not just for physicians
- CEHRT does not have relevant CDS interventions implemented
- Alert fatigue; alerts ignored and not recorded
- CDS do not relate to reported CQMs
- Obtaining proper supporting documentation
  - Locating screenshots of 5 CDS interventions; CEHRT functionality
  - Screenshots missing profile info and/or CDS enabled date
  - Audit logs/reports tracking CDS intervention history unavailable
  - EHR vendor engagement and support

# PY2021 MU Requirements – Clinical Decision Support (CDS)

Use clinical decision support (CDS) to improve performance on high-priority health conditions

## Measures

1. Implement 5 CDS interventions related to 4 or more CQMs for the entire EHR reporting period
2. Enable and implement drug-drug & drug-allergy interaction checks for the entire EHR reporting period

## Exclusion for Measure 2

Any EP who writes fewer than 100 medication orders during EHR reporting period

# MU Supporting Documentation: Clinical Decision Support (CDS)

## Measure 1

- Screenshots of 5 CDS interventions dated within EHR reporting period and identifying both EP and organization
- Documentation showing that CDS interventions were enabled for the **entire EHR reporting period**
  - If screenshots don't display enabled dates, submit **either**
    - CEHRT audit logs with enabled dates, **or**
    - vendor letter confirming enabled dates and that EPs are unable to deactivate interventions
- Documentation showing interventions tie to 4 or more CQMs related to the scope of practice, **OR** a letter from EP's Supervisor or Medical Director explaining CDS's relationship to patient population and high priority conditions

*\* For global CDS implementations, you must also submit:*

- *Screenshot with practice name and enabled date*
- *Global CDS Letter on letterhead and signed by Medical Director confirming relevance and including a list of all EPs using the CDS*

## Measure 2

- Documentation from CEHRT identifying both EP & organization showing drug-drug and drug-allergy interaction checks were enabled for the entire reporting period

# Supporting Documentation Example: Clinical Decision Support (CDS)

Screenshot of CDS alerts enabled in CEHRT with vendor name, EP name and enabled dates

The screenshot displays the 'Measure Configuration' window in an EHR system. The window title is 'EHR Vendor'. The interface includes a menu bar at the top with options like 'File', 'Patient', 'Schedule', 'EMR', 'Billing', 'Reports', 'CCD', 'Fax', 'ePayment', 'Tools', 'Community', 'Meaningful Use', 'Lock', and 'Help'. On the right side of the menu bar, there are several status icons, including a yellow '1' icon. The left sidebar shows a navigation menu with 'Admin' and 'Practice' sections. Under 'Practice', 'Pam Beasley' is highlighted. The main area contains a table of measures with columns for status, measure name, numerator, and denominator. A red box highlights the 'EHR Vendor' header and a group of measures including 'Influenza vaccine (child)', 'Influenza vaccine (high risk)', and 'Influenza vaccine (high risk)'. The status 'Enabled' is highlighted in green, and 'Disabled' is highlighted in red.

Status	Measure Name	Numerator	Denominator
Disabled	Breast cancer screening - Breast cancer screening	NUMERATOR: Number of patients in denominator who had a mammogram (ordered or self-reported) within 24 months up to and including the last day of the reporting period	DENOMINATOR: Number of unique female patients with a visit in the reporting period, aged 40 and older
Enabled	Cervical cancer screening - Cervical cancer screening	NUMERATOR: Number of patients in denominator having had a Cervical cancer screening test (PAP test) within 36 months up to and including the last day of the reporting period	DENOMINATOR: Number of unique female patients age 18-64 with a visit in the reporting period
Enabled	Influenza vaccine (child) - Influenza Vaccination (Children)	NUMERATOR: Number of patients in denominator who received a flu shot since the most recent September 1	DENOMINATOR: Number of unique patients at least 7 months but less than 5 years of age, seen for at least one visit in the reporting period
Enabled	Influenza vaccine (high risk) - Influenza Vaccination (High Risk)	NUMERATOR: Number of patients in denominator who received a flu shot since the most recent September 1	DENOMINATOR: Number of unique patients at least 18 years but less than 49 years of age, who are in the high risk group, seen for at least one visit in the reporting period
Enabled	Influenza vaccine (high risk) - Influenza Vaccination (High Risk)	NUMERATOR: Number of patients in denominator who received a flu shot since the most recent September 1	DENOMINATOR: Number of unique patients at least 5 years but less than 17 years of age, who are in the high risk group, seen for at least one visit in the reporting period
Disabled	Influenza vaccine (over 50) - Influenza Vaccination (50 and over)	NUMERATOR: Number of patients in denominator who received a flu shot since the most recent September 1	DENOMINATOR: Number of unique patients ages 50 yrs and above seen for at least one visit in the reporting period
Enabled	Pneumococcal vaccine -	NUMERATOR: Number of patients in denominator who received the	DENOMINATOR: Number of unique patients seen for a visit in the reporting period who were age

CDS enabled dates and that EPs  
cannot deactivate alerts

**EHR Vendor**

**EHR Incentive Program – Verification Letter**

EHR Vendor \_\_\_\_\_ has verified the status of the practice in support of the EHR Incentive Program. As part of this verification, Vendor \_\_\_\_\_ confirms that the practice is an active customer to Vendor \_\_\_\_\_ and their account is in a positive financial status.

Date of Issue :	December 26, 2017
Client Name :	Practice Name Licensed Provider(s): Pam Beasley, NP James Halpert, MD
Current Version :	10.0 (V10 is 2014 ONC-ATCB certified EHR Technology)
Date Of Upgrade :	Client Upgraded to: Version 10 on April 14, 2014.
Reporting Period :	2017 September 02, 2017 to November 30, 2017
ONC CHPL Product Number for V10 Complete EHR :	CHP- 1314E0
CMS EHR Certification ID for V10 Complete EHR :	1314E0
CDSS :	CDSS logs are available in the V10 _____. If the start date is empty, it indicates that the specific CDSS alert was enabled before the practice got upgraded to V10. If the status of the CDSS was changed, the username and the modified date show up on the logs. The CDSS alerts are at practice level and if enabled, they are enabled for all the providers and all the patients (that meet the alert criteria).
Drug-Drug/Allergy Interaction :	Drug-Drug/Drug-Allergy interaction is turned on by default when the V10 was installed. The provider has the ability to select the level of severity of a drug interaction that will trigger the interaction window to pop up.

EHR Vendor Representative: Creed Bratton Date: December 26, 2017

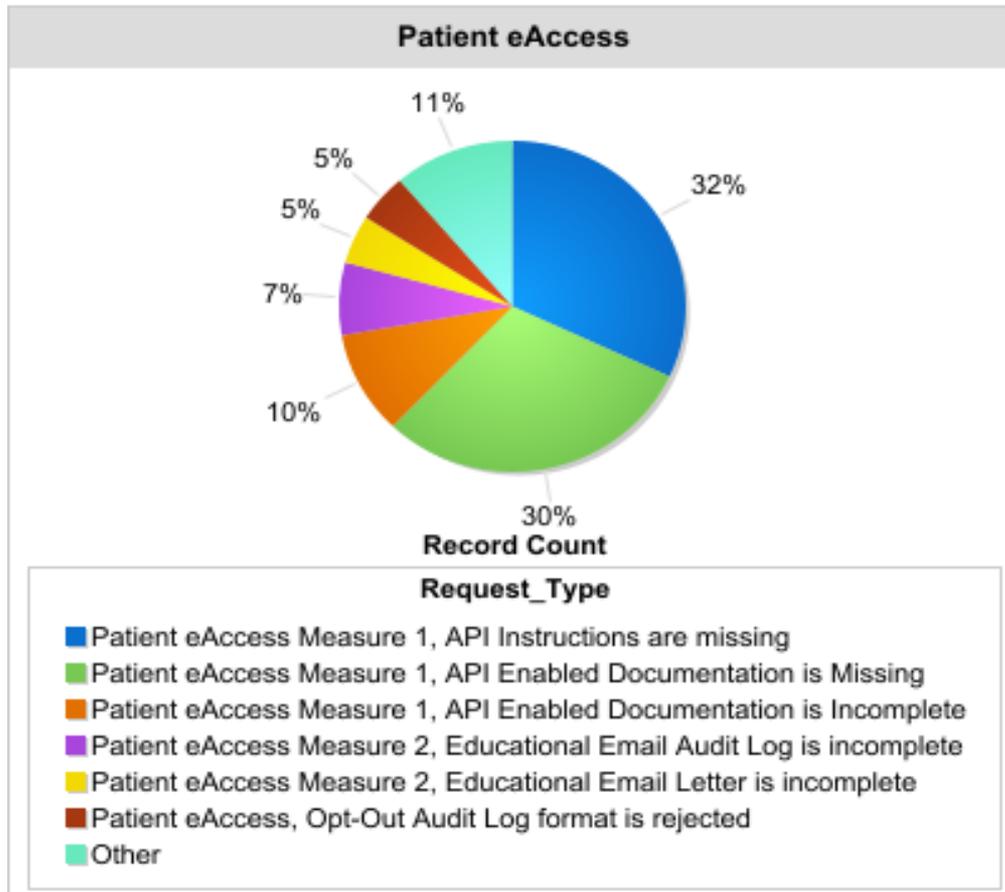

Creed Bratton

Client Representative: Pam Beasley, NP Date: 1/8/18

## Patient Electronic Access and API

# Common Issues – Patient Electronic Access and API

Common reasons for apps cycling  
(PY2020 MU applications)

- Dashboard tracking both portal and API access
- Calculating Opt Out patients
- Email education resources
- Vendor engagement and support
- Obtaining proper supporting documentation
  - Two parts to API Instructions to patients
  - API and Opt Out logs

# PY2021 MU Requirements – Patient Electronic Access and API

Provide patients with timely electronic access to their health information and patient-specific education

Measure 1\* For **more than 80%** of patients:

- 1) the patient is provided timely access to **view, download, and transmit (VDT)** their health info; and
- 2) the patient's health info is available for the patient to access using any app of their choice configured to meet the technical specs of the **Application Programming Interface (API)** in the provider's CEHRT

Measure 2\* For **more than 35%** of patients, EP must use clinically relevant information from CEHRT to identify **patient-specific educational resources** and provide electronic access to those materials

\* When patients decline to participate in electronic access to their health information and/or education, the EP can use **Opt Out** to count those patients in order to meet the thresholds for both Measure 1 and Measure 2.

# PY2021 MU Requirements – Patient Electronic Access and API

## Three Options to Meet the API Requirements

- (1) API was enabled **before** the start of the MU Reporting Period
- (2) API was enabled **during** the MU Reporting Period, the **MU Dashboard tracked API access**
- (3) API was enabled **during** the MU Reporting Period but the **MU Dashboard did not track API access**
  - Only patients who received **both VDT and API access** can be included in the numerator. For this option, you need to manually calculate your numerator and submit an API Access Audit log of patients who were given both types of access.

For more information, see our [API Guide](#)  
(the guidelines are the same for PY2020 and PY2021)

**NOTE:** As always, if you fail to meet the requirements of the MU objectives, you can try using a different MU Reporting Period, but keep in mind that this may change which option you'll need to use for Objective 5 Measure 1, and therefore the supporting documentation required.

# MU Supporting Documentation – Patient Electronic Access and API

## Measure 1: Access to View, Download and Transmit (VDT) and API Access\*

- An EHR-generated MU dashboard or report for the selected MU reporting period that shows the EP's name, numerator, denominator and percentage for this measure.
- Documentation that shows an API was **enabled** prior to or during the MU reporting period.
- A copy of the instructions provided to patients with
  - a) how to authenticate their access through an API and
  - b) information on available applications that leverage API

## Measure 2: Electronic Access to Patient Specific Education

- EHR-generated MU Dashboard or report

\* If the EP used the **Opt Out** method to meet the measure threshold(s), additional supporting documentation is required to show how the EP added **Opt Out** patients to the numerator(s). Speak with a TA on using **Opt Out**.

# MU Supporting Documentation – Patient Electronic Access and API

Screen shot of audit log displaying API enabled date

The screenshot displays a web interface for an audit log. At the top, there is a search bar labeled "Practice Name" and a dropdown menu. Below this, there are three filter boxes: "fhir", "Select Type", and "--All--", along with a search icon. The main content is a table with the following columns: Product, Activated, Actions, Last Action, and Last Message. The first row of data is circled in red and shows "FHIR" in the Product column, "06/11/2019 (0)" in the Activated column, a green plus icon in the Actions column, and "--" in the Last Message column.

Product	Activated	Actions	Last Action	Last Message
FHIR Lead Status :-	06/11/2019 (0)	+		--

# MU Supporting Documentation – Patient Electronic Access and API

Letter from EHR vendor  
verifying API enabled date

letter date

**EHR vendor name/logo**

**Dear Practice Contact,**

EHR Vendor **has enabled API functionality for** EHR name/version **based on the requirements associated with §170.315(g)(7), §170.315(g)(8), and §170.315(g)(9).** The Developer Portal gives

EHR Vendor **clients and third-party health IT companies access to our APIs and sandbox environment to develop integrated solutions that will enhance the value and functionality offered by**

EHR Vendor **services. These criteria were initially certified in December 2018 and the applicable APIs were available on or before January 1, 2019.**

**Additionally, EHR Vendor makes patient data automatically integrated in the Patient Portal, which also allows patients to view, download, and transmit their health information as required by §170.315 (e)(1): View, Download, and Transmit to 3rd Party.**

**Sincerely,**

signature, name and  
title of authorized official

# MU Supporting Documentation – Patient Electronic Access and API

API Instructions provided to patients including

- how to authenticate their app
- list of or Information on available apps

**If you are new to Patient Portal, complete your enrollment by following these steps:**

1. Follow the link below to Patient Portal. <https://www. EHR /Enroll>
2. Enter your enrollment token , your last name, date of birth, and email address. Select "Sign up for a new account" on the following screen.
3. Create a username and password. Make sure your username and password meet the requirements listed on the screen.
4. Select five security questions from the list and provide your answer for each question. These will be used for password reset security.

**If you already have a following these steps:**

**Patient Portal account, you can enroll in multiple practices by**

1. Follow the link below to Patient Portal. <https://www. EHR .com/>
2. Log in to the Patient Portal website using your original username and password. Remember that your password is case sensitive.
3. From the Menu on the left, under **My Account**, click the **Manage Practices** link to go to the multiple practice enrollment page.
4. Enter your newly assigned enrollment token , date of birth, and email address.

**Your Patient Portal account enables you to access your data through other apps and web sites using the API.**

# PY2021 MU Requirements

---

## Health Information Exchange (HIE)

# Common Issues – Health Information Exchange

Common reasons for apps cycling (PY2020 MU applications)

- Summary of Care (SOC) record sent electronically
- Query HIE Functionality not enabled vs. not available
- Meeting two of three measures
- Claiming exclusions to satisfy the objective
- Obtaining proper supporting documentation
  - Confirmation of receipt
  - SOC: Minimum problem list, medications and allergies

# PY2021 MU Requirements – Health Information Exchange

## Measure 1

For **more than 50%** of transitions and referrals, the referring EP:

1. Uses CEHRT to create a Summary of Care record
2. Electronically exchanges the summary of care record

## Measure 2

For **more than 40%** of transitions and referrals received and encounters where the EP has never before seen the patient, EP incorporates an electronic Summary of Care record in patient's EHR

- A record cannot be considered incorporated if it is discarded without the reconciliation of clinical information, or if it is stored in a manner not accessible for EP use within the EHR

## Measure 3

For **more than 80%** of transitions received and encounters where the EP has never before seen the patient, EP performs a clinical information reconciliation for the following three clinical information sets:

1. Medication
2. Medication allergy
3. Current problem list

# PY2021 MU Requirements – Health Information Exchange

## MEDICAID PROMOTING INTEROPERABILITY PROGRAM ELIGIBLE PROFESSIONALS OBJECTIVES AND MEASURE FOR 2019 OBJECTIVE 7 of 8

Health Information Exchange	
<b>Objective</b>	The eligible professional (EP) provides a summary of care record when transitioning or referring their patient to another setting of care, receives or retrieves a summary of care record upon the receipt of a transition or referral or upon the first patient encounter with a new patient, and incorporates summary of care information from other providers into their electronic health record (EHR) using the functions of certified EHR technology (CEHRT).
<b>Measures</b>	<p>An EP must attest to all three measures and meet the threshold for two measures for this objective. If the EP meets the criteria for exclusion from two measures, they must meet the threshold for the one remaining measure. If they meet the criteria for exclusion from all three measures, they may be excluded from meeting this objective.</p> <p><b>Measure 1:</b> For more than 50 percent of transitions of care and referrals, the EP that transitions or refers their patient to another setting of care or provider of care: (1) Creates a summary of care record using CEHRT; and (2) Electronically exchanges the summary of care record</p> <p><b>Measure 2:</b> For more than 40 percent of transitions or referrals received and patient encounters in which the EP has never before encountered the patient, he/she incorporates into the patient's EHR an electronic summary of care document.</p> <p><b>Measure 3:</b> For more than 80 percent of transitions or referrals received and patient encounters in which the EP has never before encountered the patient, he/she performs a clinical information reconciliation. The EP must implement clinical information reconciliation for the following three clinical information sets: (1) Medication. Review of the patient's medication, including the name, dosage, frequency, and route of each medication. (2) Medication allergy. Review of the patient's known medication allergies.</p>

The [CMS specification sheet](#) was updated in August 2019 to provide clarification about EPs who claim exclusions for 2 of the measures:

- An EP must attest to all three measures and meet the threshold for two measures for this objective.
- If the EP meets the criteria for exclusion from two measures, they must meet the threshold for the one remaining measure.
- Taking an exclusion for any given measure does **not** count toward meeting the objective.
- If they meet the criteria for exclusion from all three measures, they may be excluded from meeting this objective.

# PY2021 MU Requirements – Health Information Exchange

## Sample MU Dashboard for Objective 7

### Objective 7

Measure Name	Status	Threshold	Score	Count
Send Summaries of Care <small>Exclusion Available: Minimum denominator</small>	—	> 50%	18.2%	↗ 2 / 11 Referrals
Incorporate Summaries of Care	✓	> 40%	97.4%	↗ 110 / 113 Encounters
Clinical Information Reconciliation	✗	> 80%	47.9%	↗ 68 / 142 Encounters

# MU Supporting Documentation – Health Information Exchange

## Measure 1: Referrals and transitions of care electronically exchanged

- EHR-generated MU Dashboard or report
- Copy of one unique Summary of Care Record created by the EP
- Confirmation of receipt or proof that the receiving provider made a query of the same Summary of Care Record

## Measure 2: Electronic summary of care records received and incorporated

- EHR-generated MU Dashboard or report

## Measure 3: Clinical information reconciliation

- EHR-generated MU Dashboard or report covering clinical reconciliation of medication, medication allergies and current problem list

RE: PATIENT ID #101[REDACTED], Bernadette C., DOB: 1/1/2016

Dr. Bruce Wayne  
20 West Street  
Hudson, MA 01749

Dear Dr. Bruce Wayne,

Your patient, Bernadette C. was seen today for evaluation of her right ear that has been draining on and off with an odor for the past two weeks. She had tubes placed in 15 months ago.

Upon examination the right tube is in place. The left tube has extruded. Perforation is present in the central portion of the left drum. She said she has been using Cipro Drops. I switched her to TobraDex drops today and I will see her back in two weeks for follow.

Thank you for referring your patient, Bernadette, to our office for evaluation.

*Clark Kent, MD*

# Documentation and Post Audits

- To prepare for attestations, application validation and potential post-payment audits, it is essential to maintain documentation on how you adhered to the regulations and qualified for incentives.
- Some attesting EPs and organizations have already received requests for information from **Meyers and Stauffer**, the firm conducting post audits for earlier program years.
- All EHR Incentive Program-related records and documentation should be maintained for **at least 6 years**. Examples include:
  - Patient Volume Threshold (PVT) reporting used to demonstrate eligibility,
  - EHR generated dashboard reports,
  - Completed Security Risk Analyses (SRA) and mitigation plans, and
  - All other MU supporting documentation
