

Solicitation No. 2024-CAM-01

Questions and Answers

Q: Is the cost to design certain components of technology allowed to be covered? For example, if the engineering designs for tooling need to be paid for, is it within the guidelines?

A: Granted dollars can only be used for capital equipment, so tooling design would not be allowable. That cost may be counted towards the required 1:1 match, however.

—

Q: Is the outright purchase of equipment from a lease agreement allowable under the guidelines?

A: If you are leasing equipment and would like to purchase using awarded MMAP dollars (if the company is selected for an award), it is allowable **as long as the purchase transaction isn't initiated before your application is submitted**. If you've already purchased from the lease agreement, it would not be allowable.
